Printing a Map of the Compliance Area 5

Purpose

The purpose of the Public Regulatory application is for the public to create a compliance shape and identify associated features and special cautions within the compliance area necessary to complete fields in the Notification/Compliance document. Public customers will also be able to create a map to send to IDL with their Compliance.

Intended Use

All customers who would like a compliance with IDL will be able to use the application to create a map and determine special conditions.

IDL Public Regulatory Compliance Application

Application Website:
https://gis1.idl.idaho.gov/portal/apps/webappviewer/index.html?id=c93d6eeda7e54a5db614aa91ca10f4e6

Locate Compliance Area

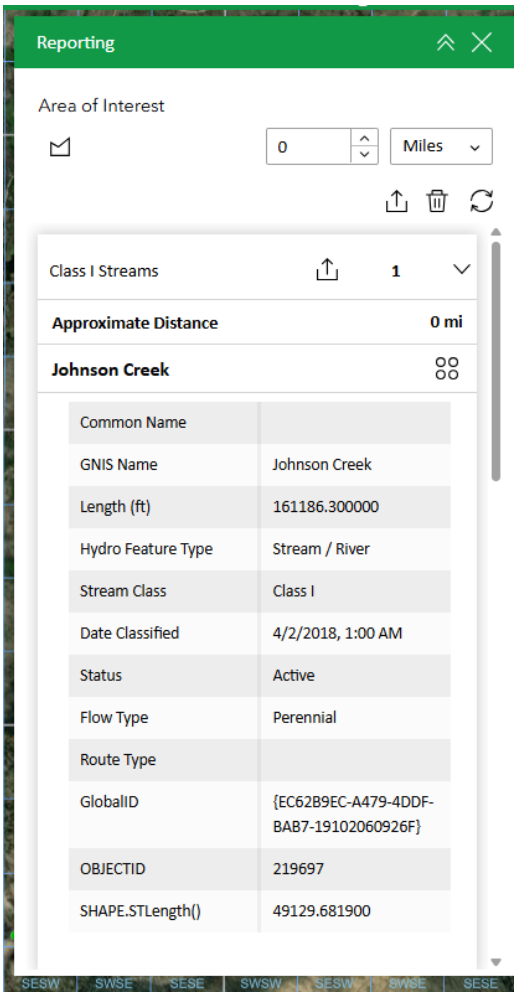

- Use the Search Widget to zoom to Area of Interest
- Using dropdown select the desired search feature

-
    - The Search bar will start to populate as you type
    - Legals should be typed – *T56N R02E, sec 01*
    - Locations can be any geographic feature
- Once you have narrowed down your location you can zoom to your search feature

Digitize Compliance Shape and Determine Site Specific Impacts

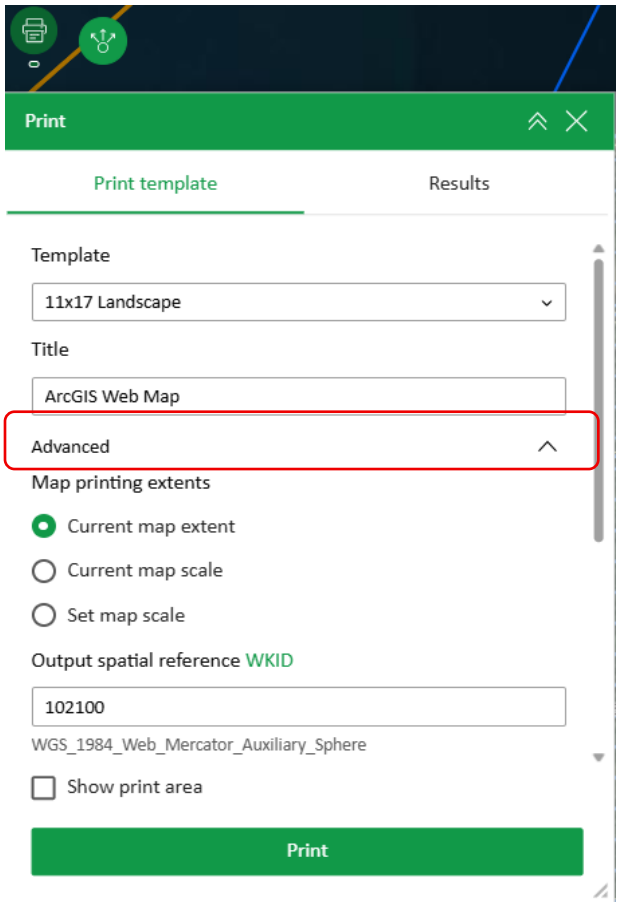

- Ensure the Reporting Widget is open
- Click on the polygon to draw a compliance area
- Change the buffer distance as desired
- Click your mouse button to draw the shape
- Double Click to complete your shape

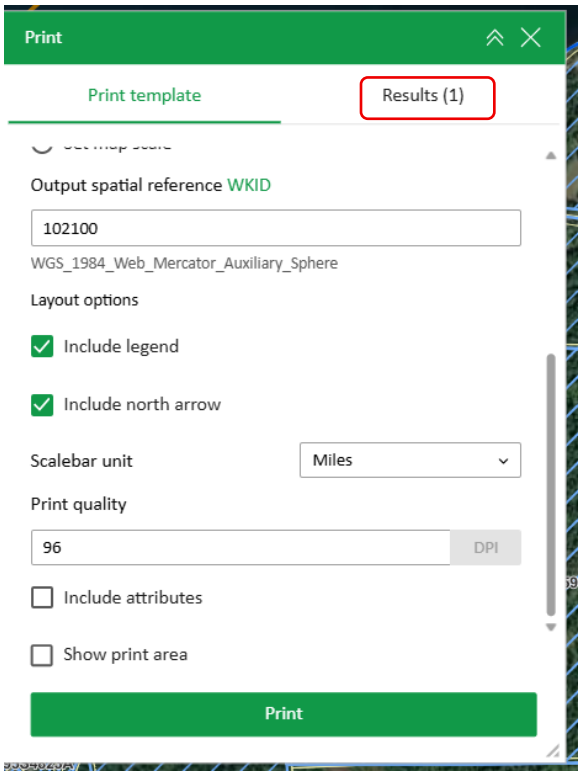

- The tool will automatically report the intersected features once the shape is complete.
- Expand each result as needed
- Export the results or delete the shape to start over
- The shape will remain until the delete button is clicked

Printing a Map of the Compliance Area

- Open the Print Widget
- Move the tool window as needed by clicking on it and dragging it to a new position
- Open the Advanced options
  - Choose Current Map Extent
- Select the desired map size
- Update Title
- Scroll down to see additional print options
- Click Print

Resize Window

- Open the Results to see the Pdf and Print or Save the map to the appropriate location
